

UNIVERSAL FIX COURSE

Instructor-led full day course for business users, integration engineers, support teams and system architects to learn all aspects of FIX protocol deployment, integration, and on-going support with practical examples and flows.

The only course we conduct regularly in cities around the world.

ADVANCED COURSE

One day course for software engineers, support teams and system architects who already work with FIX protocol on day-to-day basis and want to dig deeper into pre and post-trade functionality.

Conducted on-demand basis or for internal teams of an organisation.

CUSTOM COURSES

If you are implementing a new FIX protocol messaging system, connecting to a new execution venue, or will be supporting a new asset class over FIX - a custom course will get your team there faster.

Ask us for list of topics we cover.

Universal course is our most popular class and is conducted on regular basis in various cities around the world. We can conduct this course for your organisation's internal teams as well.

Topics in Universal FIX training class

| Module | Topic | Duration (minutes) |
|--------|--|--------------------|
| U1 | Overview, users, asset classes, and functionality | 15 |
